NDI®|HX Capability for GY-HC500 Series Camcorders

The NDI®|HX mode modification adds the capability for the GY-HC500, GY-HC550, and GY-HC500SPC to become a live video source for NDI®|HX compatible hardware or software connected to the local area network (LAN).

Features available in the NDI®|HX mode include automatic camera discovery on the LAN by supported hardware and software, tally support, and IP remote control capability.

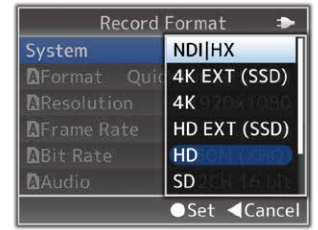

Genius Sports ScoreLink Real-Time Updates

The GY-HC500SPC has the unique ability to provide sports graphic overlays with real-time scoreboard updates to the live video output in the NDI®|HX mode. This is accomplished by directly communicating with Genius Sports ScoreLink devices and is an exclusive feature of this JVC camcorder.

CONNECTED CAM™

NDI®|HX Mode Selection

The NDI®|HX live video source capability is a mode of operation in addition to the camcorder's existing output formats. The modification adds the NDI®|HX mode to the Recording Format System selection of the camcorder. Selecting NDI®|HX sets the camera to operate solely as a live video source.

Modification for Current GY-HC500 Series

Current owners of the GY-HC500, GY-HC550, and GY-HC500SPC will be able to have their camcorders modified to incorporate the new NDI®|HX features through JVC. Please contact JVC Professional Support at 800-582-5825 for assistance.
